About This Game

Every world needs its heroes. However unlikely they may seem. Join Wilbur, Ivo, Nate and Critter in another classic point-and-click adventure in the wicked world of Aventasia. Help them fulfill their destiny. A destiny as yet unwritten.

The Tale

A few years have passed since our heroes heroically defeated the arch-witch Mortroga. And their lives, like the lives of most people in Aventásia, are still in turmoil. The War of the Two Towers is over, but the wounds it left upon the land are still bleeding.

The gnome **Wilbur Weathervane** is struggling with his new job as a teacher at the reopened School for Wizardry and Witchcraft. His magic wand is having a mind of its own and an assassination plot against the arch-mage overshadows the first democratic elections in Seastone.

Faced with political intrigues that threaten the delicate balance of peace, Wilbur is in dire need of his old friends. But the elf princess **Ivo** and the adventurer **Nate** have, after a brief romantic interlude, gone their separate ways.

Ivo has returned to her gilded cage in the elf kingdom, overprotected by her controlling mother.

Nate along with his trusty companion **Critter** has been taken prisoner on the flying island of his arch-enemy the Red Pirate.

But fate does not rest. A darkness has fallen upon the land, or rather, a pinkness. A magic force is turning mighty beasts into fluffy plush puppies and towering castles into oversized dollhouses. Can Aventásia be saved?

www.sucks A@!. Used to play online the HL mod version 10 years ago.

This is the graphical evolution.

10V10. Can't. Stop. Saving. Cows!

This is totally not my type of game, but the demo was so entertaining that I just had to put it on my wishlist, and then get it when I saw it on sale for 1.99 euro. It's well worth more than that (and I'm stingy). The graphics and humour hits the right spot for me.

It was great fun until I tried to get those stupid achievements, then it turned into frustrating no fun on the Veteran play through of Winter level 5. After far too many attempts on the previous levels each time until I got lucky, too. (Achievements only ever get in the way of enjoying a game for me, and this game was where I finally decided to say 'screw them all'. I'd really like a button in Steam to turn them all off.)

Back to just playing for the fun (screw veteran), it's entertaining me still, replaying the levels in order and the challenge and bonus ones I like.

There are plenty of levels, hours upon hours of play time! The progression is good, starts easy and gets slowly more difficult.

There are some different types of challenge levels throughout the Story mode, where I would like to just skip the one that I find no fun at all (Maid Raid), and get more of the one I like best (Back to Basics). They each unlock a few more levels of the same type once you've beaten the one in the Story mode, which is nice. There are also bonus levels where the aliens and playing area look different, and some have somewhat different special abilities (with no way that I know to read up details about them, unfortunately).

I'd have liked a way to re-check the aliens while playing in a normal level, too. My memory isn't the best anymore.

And I'd have liked a way to go to the next level in a second play through, rather than having to go back to the main menu and pick a previously played level just to get to the one after the one I just played.

And I'd much prefer the game to remember that I unticked Fullscreen, rather than having to do it again every time I launch it.

But overall, great fun. Try the free demo, it has 7 or so levels from different spots in the story mode, so you get to see easy and somewhat tougher levels in shorter time, giving you a good idea of what to expect in the full version.

. Very fun shooter, I had a lot of fun with this one.. What to say....

Another trash from RewindApp.. I killed a bete and became Cthulhu 10V10 would do it again

Great DLC. I loved the base game and love the content added with this dlc.. I got it for a really low price. Definitely worth it.

Unfortunately i don't have a 3D printer.. Game must be played in 1080, if played in 4k it will not fill the screen

rotation doesnt line up properly

little content

\$20 dollars is too much to start asking right now, either wait to open to EA or lower price. Garish, ugly and twitchy as hell. Obviously don't bother.

<https://youtu.be/VnkQhfYNMxvo>. It's a cool software especially for CSGO and Rust but pity it's not games like Payday 2, Team Fortress 2, Trackmania compatible with this software but I believe in it is devloppeur and I think that later there will be much more

[I think it would be even cooler than it is already](#)

[Thanks for your attention.. It's a cool soundtrack, and well worth the money . I just wish that it would show in the "Music" section of my steam library .. Very nice game. \(turn-based, party advancement, different loot levels\). The holiday special supprises are fun.](#)
